Experience

The All-Florida management team has over thirty years of residential construction experience on a national level. AFRG's expertise as remediation and restoration specialists assures the satisfaction of the homeowner.

All-Florida Remodeling Group is located in Boca Raton, Florida. We are a Florida State licensed and fully insured General Contractor. All-Florida Remodeling Group is a division of P. Cucci Development Corp. We are known for our high standard of professionalism, dependability, reliability and attention to detail in customer service and quality workmanship. Our sub-contractor group is made up of well established local members of the contracting community.

We are experienced restoration specialists and have combined our expertise in hurricane, water, mold and fire remediation resulting in a team dedicated to the detection, testing and removal of Chinese Drywall.

an all-in-one solution for imported drywall removal

STREAMLINED PROCESS

All Florida Remodeling Group has streamlined the remediation and restoration process of a home with Chinese Drywall to facilitate an organized and accommodating experience for homeowners. With over 30 years of experience in the residential construction and restoration industry, AFRG has an unsurpassed level of expertise in each trade that is necessary to eradicate the presence of Chinese Drywall in a home.

PROJECT MANAGEMENT

Our management team, project managers and customer service personnel possess the skill, sensitivity and integrity that make us the obvious choice as a Chinese Drywall restoration specialist. We treat our relationships with our clients like a partnership and provide guidance through each phase of mobilization, construction and restoration.

INSPECTION

We inspect the home for the presence of toxic drywall and provide a case specific solution.

DOCUMENTATION

Chain of custody documentation is completed. Digital pictures and video are taken to record the pre-existing conditions and staging of the home.

PRE-SCHEDULING

We perform a walk through with each homeowner before the work begins so that they understand the process and know what to expect.

MOBILIZATION - RELOCATION & TEMP HOUSING

We relocate all of the contents of the home into storage during the remediation process. The homeowner and personal effects are placed in temporary housing until the home is complete.

REMEDICATION & RESTORATION

We contain, remediate and restore the toxic drywall and any HVAC, plumbing, structural, architectural and electrical components or systems that have been compromised. HEPA cleaning is performed when the remediation process is complete and prior to drywall re-installation.

WE BELIEVE THAT QUALITY IS THE RESULT OF CAREFUL PLANNING AND EXECUTION

We use the latest technologies, combined with innovative workflow methods and state-of-the-art communication tools
